

# Ken-Ton Big Picture TGIF

One student at a time.

## 001 Students Get Out of the Classroom to Learn

The 001 students spent some time this week getting out of the classroom to see some of the art murals painted on buildings in Buffalo. Advisor Karen Monaco took students to some of the local art projects to learn more about the paintings, the composition of the art and the colors used to create the art.

Students enjoyed getting out of the classroom and checking out what some local artists have been able to create! You can see some of the murals the students visited on Page 2.

## Learning Through Internships

### Students Get Involved in Many Ways

One of the Big Picture distinguishers in our Learning Through Internships program. Students find different careers that interest them and the Big Picture Internship Coordinators help the students link up with local businesses and professionals. Students start with a shadow day to see if the placement will be a good fit for an internship. If the prospective mentor and the student agree it is a good fit, then an internship can begin. Students attend their internship on Tuesdays and Thursdays for minimally 8 weeks. Some internships last longer as they are such great fits and the student is learning so much about a career that interests them.

Often unique opportunities present themselves at internships. Pictured above is 301 student Alivia Stump who is interning at Lindbergh Elementary. Alivia has had a great start to her internship and was asked to help the school with make-up for their school musical this week.
