2023-2024
Benjamin Franklin Elementary School
School Improvement Plan

The Franklin Elementary School Shared Decision Making Team (SDMT) is composed of Building Leaders, Teacher Leaders, Support Staff Leaders and Parent, Student and Community Members. Each Leader works with a team of stakeholders to complete the needs assessment for the respective area and identifies those items of focus and priority with the SDMT for review as part of the comprehensive improvement process.

Team Members:	Role:
Kia Evans	Principal
Kelly Radley	Assistant Principal
Michael Muscarella	Director of Elementary Education
Alex Bianchi	1st Grade Teacher
Nicole MacClellan	Teaching Assistant
Amelia Morton	Kindergarten Teacher
Dan Myers	4th Grade Teacher
Dianne Shadden	Secretary
Amy Butler	Instructional Specialist - Elementary ELA
Mary Russell	Speech Teacher
Erin Marshall	Music Teacher
Jennifer Tracey	SPED Teacher
Jocelyn Czaja	Second Grade Teacher
Kathleen Flynn	ENL Teacher

The Franklin Elementary School Shared Decision Making Team is designed to comprehensively review and evaluate progress toward the Ken-Ton Forward Goals and Objectives, and ESSA Indicators.

There are five fundamental areas of district improvement including:

Instruction for All Students • Social Emotional Health and Wellness • Technology • Community Engagement • Finance, Safety and Operations

KT Forward Focus Area:
INSTRUCTION FOR ALL STUDENTS

School-Wide Goal: Literacy

- By June 2024, all students in grades K-4 will demonstrate an 75% minimum in reading proficiency (on or above grade level), as measured by NSGRA Step 4

School-Wide Goal: Mathematics

- For the 2023-2024 school year, students in grades K-4 will achieve 65% proficiency on the Eureka Math² module assessments.

Goal: Literacy

- By June 2024, all students in grades K-4 will demonstrate an 75% minimum in reading proficiency (on or above grade level), as measured by NSGRA Step 4

Activity(s) or Action Steps *What activities, or Action Steps will we pursue to address our FOCUS AREA(s)?*	**The Plan to Assess - What / Who** *How will each action plan or action step be monitored and who will be responsible?*		**Goal Target & Progress** *How often and when will progress monitoring occur*		
	How will it be Monitored? (What, assessment, instrument, etc will be used?)	**Who will be Responsible**	**Baseline** **(June 2023 Results)**	**Mid-Year Goal & Progress** **(Short-Term)**	**EOY Goal & Progress** **(Long-Term)**
➢ Follow Scholastic Literacy curriculum maps and maintain pacing ➢ Implementation of Heggerty Phonological & Phonemic Awareness in all classrooms (Grades K & 1)	Administrative observation and monthly grade level reflections shared during SDMT meetings	Classroom teachers, Administration, Reading ISS	NSGRA Data from June 2023 indicates that 71% of students were proficient in reading.	**Goal: 20 week Target** 72% of students will be on or above grade level as measured by NSGRA Step 4	**Goal: EOY Target** By June 2024 we expect 75% of students to be on or above grade level as measured by NSGRA Step 4.
➢ Full implementation of a RISE block into the schedule (Grades 2 & 3) ➢ Small group guided reading instruction utilizing Jan Richardson NSFGR lesson plan templates	Administrative observation and monthly grade level reflections shared during SDMT meetings	Classroom teachers, Administration, Reading ISS Classroom teachers, RtI reading,		**Updated Progress: By February, 2024** 72% of students are reading on or above benchmark as measured by NSGRA Step 4	**Updated Progress: by June 2024** 73% of students are reading on or above benchmark as measured by NSGRA Step 4

➢ Utilize the KenTon Student Engagement Playbook to support increased student engagement in literacy activities. ➢ Implement targeted interventions to support students in letter ID, letter sound ID, decoding, and fluency. ➢ Administer Scholastic Literacy end-of-the-unit assessments electronically to provide opportunities for students to respond to text in writing (Grades 2, 3, and 4).	Scheduling, administrative observation Guided reading instruction will be evident in classrooms beginning no later than Sept. 28th. Administrative observation and monthly grade level reflections shared during SDMT meetings DAT Meetings, IST Meetings Assessment data	Administration, Mary Bieger Classroom teachers, Reading ISS Classroom Teachers, Administration Classroom teachers, RtI reading, Special education teachers 2nd, 3rd, and 4th grade teachers, Technology ISS, Reading ISS			

Goal: Mathematics

- For the 2023-2024 school year, students in grades K-4 will achieve 65% proficiency on the Eureka Math² module assessments

Activity(s) or Action Steps *What activities, or Action Steps will we pursue to address our FOCUS AREA(s)?*	**The Plan to Assess - What / Who** *How will each action plan or action step be monitored and who will be responsible?*		**Goal Target & Progress** *How often and when will progress monitoring occur*		
	How will it be Monitored? (What, assessment, instrument, etc will be used?)	**Who will be Responsible**	**Baseline** **(June 2023 Results)**	**Mid-Year Goal & Progress** **(Short-Term)**	**EOY Goal & Progress** **(Long-Term)**
➢ K-4 teachers will include all lesson components (Fluency, Launch, Learn, and Land) within the 60 minute math block. ➢ K-4 teachers will continue to use and reference pacing guides and maintain the scope and sequence. ➢ K-4 teachers will work to build instructional routines embedded in Eureka Math. ➢ K-4 teachers will focus on student discourse with an emphasis on math talk and engagement strategies.	Teachers will implement all lesson components (Fluency, Launch, Learn, and Land) in 60 minutes with fidelity. Teacher lesson plans aligned to the pacing guide. Eureka Math² Module Assessments	K-4 teachers, math coaches, math ISS, math liaisons, building administrators	Eureka Math module data from the 22-23 school year indicates that 58% of students were proficient in math based on the average scores from module assessments.	**Goal: 20 week Target** By January 2024, we expect 61% of students in grades K-4 to be proficient on the Eureka Math² module assessments.	**Goal: EOY Target** By June 2024, we expect 65% of students in grades K-4 to be proficient on the Eureka Math² module assessments.
				Updated Progress: By February, 2024 Student proficiency rates by February 2024; by grade levels: K- 75% 1- 76% 2- 62% 3- 33% 4- 49%	**Updated Progress: by June 2024** Student proficiency rates by June 2024; by grade levels: K- 76% 1- 70% 2- 68% 3- 38% 4- 67%

KT Forward Focus Area:
SOCIAL EMOTIONAL HEALTH AND WELLNESS

Goal: K-4 Social Emotional Learning or Parent involvement or school climate and culture

- Franklin Elementary School will increase parent engagement and participation by hosting at least 12 school wide events by June 2024.

Activity(s) or Action Steps *What activities, or Action Steps will we pursue to address our FOCUS AREA(s)?*	**The Plan to Assess - What / Who** *How will each action plan or action step be monitored and who will be responsible?*		**Goal Target & Progress** *How often and when will progress monitoring occur*		
	How will it be Monitored? (What, assessment, instrument, etc will be used?)	**Who will be Responsible**	**Baseline** **(June 2023 Results)**	**Mid-Year Goal & Progress** **(Short-Term)**	**EOY Goal & Progress** **(Long-Term)**
➢ Increase family engagement activities (i.e.family skate night, family literacy night, family math night, Ice Cream Social, fall dance) ➢ Increase Facebook engagement with community on Franklin Elementary School Facebook page ➢ Reach out via mail to families to keep their information updated on Infinite Campus ➢ Educate families about the importance of the Satchel Pulse survey.	➢ The actual number of school wide events ➢ Satchel Pulse survey input ➢ Satchel Pulse number of participants	➢ Building Principal ➢ Building Assistant Principal ➢ Teachers ➢ Parent Teacher Association ➢ Main Office Staff	In 2023, Franklin hosted 11 school wide events.	**Goal: 20 week Target** By January 30, 2024, Franklin Elementary will have hosted 6 school wide events.	**Goal: EOY Target** By June 30, 2024, Franklin Elementary will have hosted 12 school wide events.
				Updated Progress: By February, 2024 Franklin hosted 6 community events; some were free.	**Updated Progress: by June 2024** Franklin hosted a total of 13 events by June 26, 2024.

Goal: K-4 Attendance Improvement

- To strive for at least a 95% school attendance rate for the 23-24 school year.
- By June 2024, the Franklin Elementary School Chronic Absenteeism rate will not exceed 25%.

Activity(s) or Action Steps *What activities, or Action Steps will we pursue to address our FOCUS AREA(s)?*	**The Plan to Assess - What / Who** *How will each action plan or action step be monitored and who will be responsible?*		**Goal Target & Progress** *How often and when will progress monitoring occur*		
	How will it be Monitored? (What, assessment, instrument, etc will be used?)	**Who will be Responsible**	**Baseline** **(June 2023 Results)**	**Mid-Year Goal & Progress** **(Short-Term)**	**EOY Goal & Progress** **(Long-Term)**
➢ Review attendance policies and publish attendance policy guidelines for families. ➢ Update the letter (nudge) to families regarding attendance. ➢ Teachers will contact families regarding attendance issues. ➢ Hold attendance meetings every 3 weeks to review data on absenteeism of students. ➢ Send "nudge notification" letter to all chronically absent students ○ Phone calls home ○ Home visits ○ Meetings with Parents ➢ Send home strategies on attendance to all families	➢ Attendance policy posted on the webpage ➢ Completed Nudge Letters ➢ Phone calls home after three unexcused absences ➢ Google Calendar Dates ➢ Copies of letters sent ➢ Phone logs ➢ Fliers	➢ Attendance Team/Mental Health Team ➢ Social Worker ➢ Attendance Clerk ➢ Classroom teachers ➢ Building Principal ➢ Building Assistant Principal	The percent of chronically absent students in the 22-23 school year was 30%. The average rate of daily attendance for the 22-23 school year was 92%.	**Goal: 20 week Target** 23 % or less students in grades K-4 will be chronically absent *(10% or more of the days enrolled in school).*	**Goal: EOY Target** No more than 25% of students will be chronically absent in the 23-24 school year.
				Updated Progress: By February, 2024 19.6% of students were chronically absent on February 1, 2024.	**Updated Progress: by June 2024** 19.8% of students were chronically absent in the 23-24 school year.

Appendix A

Performance Report with Gap Analysis by Location

District Name: Kenmore
School Year: 2023

Location: Ben Franklin ES
Test: Grade 3 Math

		Location n=83		District n=458		Erie 1 BOCES n=4,315	
		% Points Earned	% CR Full Credit	% Points Earned	Gap to District	% Points Earned	Gap to Erie 1 BOCES
Domain: Operations and Algebraic Thinking							
Cluster: Represent and solve problems involving multiplication and division.							
NY-3.OA.1 Interpret products of whole numbers. e.g., Interpret 5 × 7 as the total number of objects in 5 groups of 7 objects each. Describe a context in which a total number of objects can be expressed as 5 × 7.	12-MC	57%		60%	-4%	71%	-15%
NY-3.OA.2 Interpret whole-number quotients of whole numbers. e.g., Interpret 56 ÷ 8 as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. Describe a context in which a number of shares or a number of groups can be expressed as 56 ÷ 8.	31-CR	54%	54%	67%	-13%	77%	-23%
NY-3.OA.3 Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities. e.g., using drawings and equations with a symbol for the unknown number to represent the problem.	22-MC	57%		63%	-6%	76%	-20%
	28-MC	48%		59%	-11%	66%	-18%
NY-3.OA.4 Determine the unknown whole number in a multiplication or division equation relating three whole numbers. e.g., Determine the unknown number that makes the equation true in each of the equations 8 × ? = 48, 5 = __ ÷ 3, 6 × 6 = ?.	01-MC	65%		79%	-14%	85%	-20%
Cluster: Understand properties of multiplication and the relationship between multiplication and division.							
NY-3.OA.5 Apply properties of operations as strategies to multiply and divide. e.g., • If 6 × 4 = 24 is known, then 4 × 6 = 24 is also known. (Commutative property of multiplication) • 3 × 5 × 2 can be found by 3 × 5 = 15, then 15 × 2 = 30, or by 5 × 2 = 10, then 3 × 10 = 30. (Associative property of multiplication) • Knowing that 8 × 5 = 40 and 8 × 2 = 16, one can find 8 × 7 as 8 × (5 + 2) = (8 × 5) + (8 × 2) = 40 + 16 = 56. (Distributive property)	19-MC	65%		73%	-8%	80%	-15%
NY-3.OA.6 Understand division as an unknown-factor problem. e.g., Find 32 ÷ 8 by finding the number that makes 32 when multiplied by 8.	25-MC	61%		71%	-10%	82%	-21%
Cluster: Solve problems involving the four operations, and identify and extend patterns in arithmetic.							
NY-3.OA.8a Represent these problems using equations or expressions with a letter standing for the unknown quantity.	08-MC	65%		69%	-3%	75%	-10%
	26-MC	61%		67%	-6%	74%	-13%
NY-3.OA.9 Identify and extend arithmetic patterns (including patterns in the addition table or multiplication table).	15-MC	23%		34%	-11%	41%	-18%
	35-CR	23%	18%	36%	-13%	47%	-24%

Performance Report with Gap Analysis by Location

District Name: Kenmore
School Year: 2023

Location: Ben Franklin ES
Test: Grade 3 Math

		Location n=83		District n=458		Erie 1 BOCES n=4,315	
		% Points Earned	% CR Full Credit	% Points Earned	Gap to District	% Points Earned	Gap to Erie 1 BOCES
Domain: Number and Operations in Base Ten							
Cluster: Use place value understanding and properties of operations to perform multi-digit arithmetic.							
NY-3.NBT.1 Use place value understanding to round whole numbers to the nearest 10 or 100.	10-MC	52%		50%	1%	62%	-10%
NY-3.NBT.3 Multiply one-digit whole numbers by multiples of 10 in the range 10-90 using strategies based on place value and properties of operations.	03-MC	57%		63%	-7%	74%	-18%
NY-3.NBT.4a Understand that the digits of a four-digit number represent amounts of thousands, hundreds, tens, and ones. e.g., 3,245 equals 3 thousands, 2 hundreds, 4 tens, and 5 ones.	37-CR	23%	11%	35%	-13%	44%	-21%
Domain: Number and Operations—Fractions							
Cluster: Develop understanding of fractions as numbers.							
NY-3.NF.2a Represent a fraction 1/b on a number line by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size 1/b and that the endpoint of the part starting at 0 locates the number 1/b on the number line.	20-MC	60%		77%	-16%	81%	-21%
NY-3.NF.2b Represent a fraction a/b on a number line by marking off a lengths 1/b from 0. Recognize that the resulting interval has size a/b and that its endpoint locates the number a/b on the number line.	24-MC	58%		73%	-15%	83%	-25%
NY-3.NF.3a Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.	05-MC	39%		49%	-11%	55%	-16%
NY-3.NF.3b Recognize and generate equivalent fractions. e.g., 1/2 = 2/4 ; 4/6 = 2/3 . Explain why the fractions are equivalent. e.g., using a visual fraction model.	29-MC	27%		44%	-18%	57%	-31%
NY-3.NF.3c Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. e.g., Express 3 in the form 3 = 3/1 , recognize that 6/3 = 2, and locate 4/4 and 1 at the same point on a number line.	16-MC	61%		66%	-5%	76%	-15%
NY-3.NF.3d Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons rely on the two fractions referring to the same whole. Record the results of comparisons with the symbols >, =, or <, and justify the conclusions. e.g., using a visual fraction model.	38-CR	27%	4%	38%	-12%	50%	-24%

Domain: Measurement and Data							
Cluster: Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.							
NY-3.MD.1 Tell and write time to the nearest minute and measure time intervals in minutes. Solve one-step word problems involving addition and subtraction of time intervals in minutes. e.g., representing the problem on a number line or other visual model.	09-MC	65%		69%	-4%	73%	-8%
	36-CR	45%	31%	56%	-11%	64%	-19%
NY-3.MD.2b Add, subtract, multiply, or divide to solve one-step word problems involving masses or liquid volumes that are given in the same units. e.g., using drawings (such as a beaker with a measurement scale) to represent the problem.	06-MC	76%		80%	-4%	86%	-10%
Cluster: Geometric measurement: understand concepts of area and relate area to multiplication and to addition.							
NY-3.MD.5a Recognize a square with side length 1 unit, called "a unit square," is said to have "one square unit" of area, and can be used to measure area.	23-MC	46%		51%	-5%	55%	-9%
	33-CR	28%	28%	31%	-3%	41%	-14%
NY-3.MD.5b Recognize a plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.	27-MC	88%		91%	-3%	93%	-5%
NY-3.MD.6 Measure areas by counting unit squares.	02-MC	84%		88%	-3%	89%	-4%
NY-3.MD.7a Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.	14-MC	31%		47%	-16%	60%	-29%
NY-3.MD.7c Use tiling to show in a concrete case that the area of a rectangle with whole-number side length a and side length b + c is the sum of a × b and a × c. Use area models to represent the distributive property in mathematical reasoning.	30-MC	70%		70%	0%	76%	-6%
NY-3.MD.7d Recognize area as additive. Find areas of figures composed of non-overlapping rectangles, and apply this technique to solve real world problems.	18-MC	22%		41%	-19%	49%	-27%
Domain: Geometry							
Cluster: Reason with shapes and their attributes.							
NY-3.G.2 Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. e.g., Partition a shape into 4 parts with equal area, and describe the area of each part as 1/4 of the area of the shape.	32-CR	45%	45%	57%	-12%	62%	-18%
	34-CR	32%	27%	40%	-8%	48%	-16%

Performance Report with Gap Analysis by Location

District Name: Kenmore
School Year: 2023

Location: Ben Franklin ES
Test: Grade 4 Math

		Location n=92		District n=407		Erie 1 BOCES n=4,055	
		% Points Earned	% CR Full Credit	% Points Earned	Gap to District	% Points Earned	Gap to Erie 1 BOCES
Domain: Measurement and Data							
Cluster: Represent and interpret data.							
NY-3.MD.4 Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Showthe data by making a line plot where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters.	09-MC	36%		45%	-9%	50%	-14%
NY-4.MD.4 Make a line plot to display a data set of measurements in fractions of a unit (1/2 , 1/4 , 1/8). Solve problems involving addition and subtraction of fractions by using information presented in line plots. e.g., Given measurement data on a line plot, find and interpret the difference in length between the longest and shortest specimens in an insect collection.	13-MC	42%		51%	-9%	58%	-16%
Cluster: Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures.							
NY-3.MD.8b Identify rectangles with the same perimeter and different areas or with the same area and different perimeters.	40-CR	24%	10%	27%	-2%	44%	-20%
Cluster: Geometric measurement: understand concepts of angle and measure angles.							
NY-4.MD.5a Recognize an angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through 1/360 of a circle is called a "one-degree angle," and can be used to measure angles.	38-CR	57%	57%	57%	0%	64%	-8%
NY-4.MD.6 Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.	25-MC	75%		72%	3%	81%	-6%
Domain: Geometry							
Cluster: Reason with shapes and their attributes.							
NY-3.G.1 Recognize and classify polygons based on the number of sides and vertices (triangles, quadrilaterals, pentagons, and hexagons). Identify shapes that do not belong to one of the given subcategories.	28-MC	67%		67%	0%	74%	-7%
Cluster: Draw and identify lines and angles, and classify shapes by properties of their lines and angles.							
NY-4.G.1 Drawpoints, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.	33-MC	49%		43%	5%	55%	-6%
NY-4.G.2a Identify and name triangles based on angle size (right, obtuse, acute).	06-MC	75%		74%	1%	84%	-9%
NY-4.G.2b Identify and name all quadrilaterals with 2 pairs of parallel sides as parallelograms.	15-MC	43%		45%	-2%	55%	-11%
NY-4.G.2c Identify and name all quadrilaterals with four right angles as rectangles.	39-CR	12%	8%	13%	-1%	21%	-9%
NY-4.G.3 Recognize a line of symmetry for a two dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.	23-MC	50%		38%	12%	50%	0%
	31-MC	78%		79%	-1%	82%	-4%

Performance Report with Gap Analysis by Location

District Name: Kenmore
School Year: 2023

Location: Ben Franklin ES
Test: Grade 4 Math

		Location n=92		District n=407		Erie 1 BOCES n=4,055	
		% Points Earned	% CR Full Credit	% Points Earned	Gap to District	% Points Earned	Gap to Erie 1 BOCES
Domain: Operations and Algebraic Thinking							
Cluster: Use the four operations with whole numbers to solve problems.							
NY-4.OA.1 Interpret a multiplication equation as a comparison. Represent verbal statements of multiplicative comparisons as multiplication equations. e.g., • Interpret 35 = 5 x 7 as a statement that 35 is 5 times as many as 7 or 7 times as many as 5. • Represent "Four times as many as eight is thirty-two" as an equation, 4 x 8 = 32.	02-MC	93%		91%	2%	94%	-1%
	14-MC	29%		36%	-7%	44%	-15%
NY-4.OA.2 Multiply or divide to solve word problems involving multiplicative comparison, distinguishing multiplicative comparison from additive comparison. Use drawings and equations with a symbol for the unknown number to represent the problem.	08-MC	40%		50%	-10%	60%	-20%
	20-MC	33%		41%	-8%	53%	-21%
	42-CR	46%	27%	52%	-6%	65%	-19%
NY-4.OA.3a Represent these problems using equations or expressions with a letter standing for the unknown quantity.	34-MC	76%		79%	-3%	82%	-6%
Cluster: Gain familiarity with factors and multiples.							
NY-4.OA.4 Find all factor pairs for a whole number in the range 1-100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1-100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1-100 is prime or composite.	11-MC	42%		40%	3%	47%	-5%
Cluster: Generate and analyze patterns.							
NY-4.OA.5 Generate a number or shape pattern that follows a given rule. Identify and informally explain apparent features of the pattern that were not explicit in the rule itself. e.g., Given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.	17-MC	29%		31%	-2%	50%	-21%
Domain: Number and Operations in Base Ten							
Cluster: Generalize place value understanding for multi-digit whole numbers.							
NY-4.NBT.1 Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. e.g., Recognize that 70 × 10 = 700 (and, therefore, 700 ÷ 10 = 70) by applying concepts of place value, multiplication, and division.	22-MC	45%		49%	-5%	56%	-11%
NY-4.NBT.2a Read and write multi-digit whole numbers using base ten numerals, number names, and expanded form. e.g., 50,327 = 50,000 + 300 + 20 + 7.	01-MC	84%		81%	2%	88%	-4%
NY-4.NBT.2b Compare two multi-digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons.	26-MC	74%		72%	2%	81%	-7%
NY-4.NBT.3 Use place value understanding to round multi-digit whole numbers to any place.	37-CR	42%	42%	47%	-5%	65%	-22%

Performance Report with Gap Analysis by Location

District Name: Kenmore
School Year: 2023

Location: Ben Franklin ES
Test: Grade 4 Math

		Location n=92		District n=407		Erie 1 BOCES n=4,055	
		% Points Earned	% CR Full Credit	% Points Earned	Gap to District	% Points Earned	Gap to Erie 1 BOCES
Domain: Number and Operations in Base Ten							
Cluster: Use place value understanding and properties of operations to perform multi-digit arithmetic.							
NY-4.NBT.5 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	05-MC	42%		44%	-1%	68%	-26%
	35-MC	76%		79%	-3%	87%	-11%
NY-4.NBT.6 Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	18-MC	37%		33%	4%	44%	-7%
	30-MC	57%		59%	-3%	71%	-14%
	43-CR	39%	24%	44%	-5%	54%	-15%
Domain: Number and Operations—Fractions							
Cluster: Extend understanding of fraction equivalence and ordering.							
NY-4.NF.1 Explain why a fraction a/b is equivalent to a fraction a/bxn by using visual fraction models, with attention to howthe number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions.	04-MC	60%		55%	5%	72%	-12%
	29-MC	57%		56%	0%	66%	-9%
NY-4.NF.2 Compare two fractions with different numerators and different denominators. Recognize that comparisons are valid only when the two fractions refer to the same whole. e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as 1/2 . Record the results of comparisons with symbols >, =, or <, and justify the conclusions. e.g., using a visual fraction model.	32-MC	43%		50%	-7%	67%	-23%
Cluster: Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.							
NY-4.NF.3b Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions. e.g., by using a visual fraction model such as, but not limited to: ▪ 3/8 = 1/8 + 1/8 + 1/8 ▪ 3/8 = 1/8 + 2/8 ▪ 2 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1	41-CR	60%	40%	61%	-1%	68%	-8%
NY-4.NF.3c Add and subtract mixed numbers with like denominators. e.g., replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.	10-MC	59%		59%	-1%	65%	-7%
NY-4.NF.3d Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators. e.g., using visual fraction models and equations to represent the problem.	36-CR	68%	68%	70%	-2%	71%	-3%
NY-4.NF.4b Understand a multiple of a/b as a multiple of 1/b , and use this understanding to multiply a whole number by a fraction. e.g., Use a visual fraction model to express 3 × 2/5 as 6 × 1/5 , recognizing this product as 6/5 , in general, n × a/b = (n × a) /b.	19-MC	63%		66%	-3%	70%	-7%
